CUSTOM SERIES

While we manufacture and stock many different models of heat and vacuum sealers, we know that the need arises for some custom product. Gramatech has both the technical and engineering capability to create the specific machine for your particular and unique requirements. Our seal lengths range from 6" to 96". Our optional features can include, but are not limited to, PLC utilization, advanced vacuum controls, high-flow and multi-stage venturi systems, and many more. Most of the time, the question is not IF we can do it, but rather HOW FAST can you get it done.

Take a look at some of the features we've already incorporated in our units, and more are coming.

- Low-pressure safety decent
- Advanced PLC programming
- Digital temperature control
- Ultra-high pressure sealing (thick foams)
- Opto-touch Ergonomic Safety switches
- Reinforced heavy duty frame
- Touch screen control with supervisor lock out
- Emergency stop buttons
- Independent nozzle control (multiple nozzles only)
- Gun drilled seal/cooling bar
- Advanced temperature control system
- Vacuum control, either time based or inches of Mercury
- And many, many more
