

HAND SEALERS

convertible table top

This economy line of quick and efficient table top hand sealers all come standard with Gramatech's new "Convertible System." This system gives you the choice of two sealing widths. The wider width, which comes installed on the machine, is almost a full 1/4" for greater seal integrity on hard to seal materials. The other element is 1/16", standard on most other machines, for those times when a tear seal is desired. These elements are easily changed without the use of any special tools. These table top units are available in the two most popular sizes, 8 and 12 inches, and with or without a sliding knife. So whether your sealing job calls for a few bags or a few thousand, these table top sealers are the units you are looking for.

HAND SEALERS

Convertible System

- Versatile:
Wider seals for improved seal integrity on metallized and thicker poly materials and a narrow seal for acetics or tear applications. Comes with two interchangeable seal widths ~ 1/4" installed on machine and a narrow 1/16" that can be installed in minutes.

All Metal Construction

- Durable:
Body formed out of rugged cast aluminum that takes wear and tear better than plastic like some competitors machines.

Solid-State Impulse Timers

- Increased productivity:
Easy to use turn-dial for accurate setting for a quality seal every time with minimal operator interface.

Underwriter Laboratories (UL) Approved

- Quality:
Machines are tested and approved by UL to give you peace of mind that these machines meet the standards of electrical safety set by a nationally recognized testing lab.

Quick Change Sliding Knife (on "C" models only)

- Increased performance:
Sliding knife maybe used to trim a premade bag or to make bags with economical lay-flat tubing.
- Cost effectiveness:
Make 1 or 100 custom bags with economical lay-flat tubing. You make the bags the size you need when you need them.

ACCESSORIES

- Spare Parts Kit #SPK-P/N
- Teflon
- Trim Knives
- Roller for Lay-Flat Tubing
